## Step:6

IBM Watson IoT Platform

Service Details - IBM Cloud | IBM Watson IoT Platform | Downloads | New Tab

7xapma.internetofthings.ibmcloud.com/dashboard/devices/browse/add

Identity | Device Information | Security | Summary

There are two options for selecting a device authentication token.

**Auto-generated authentication token (default)**

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

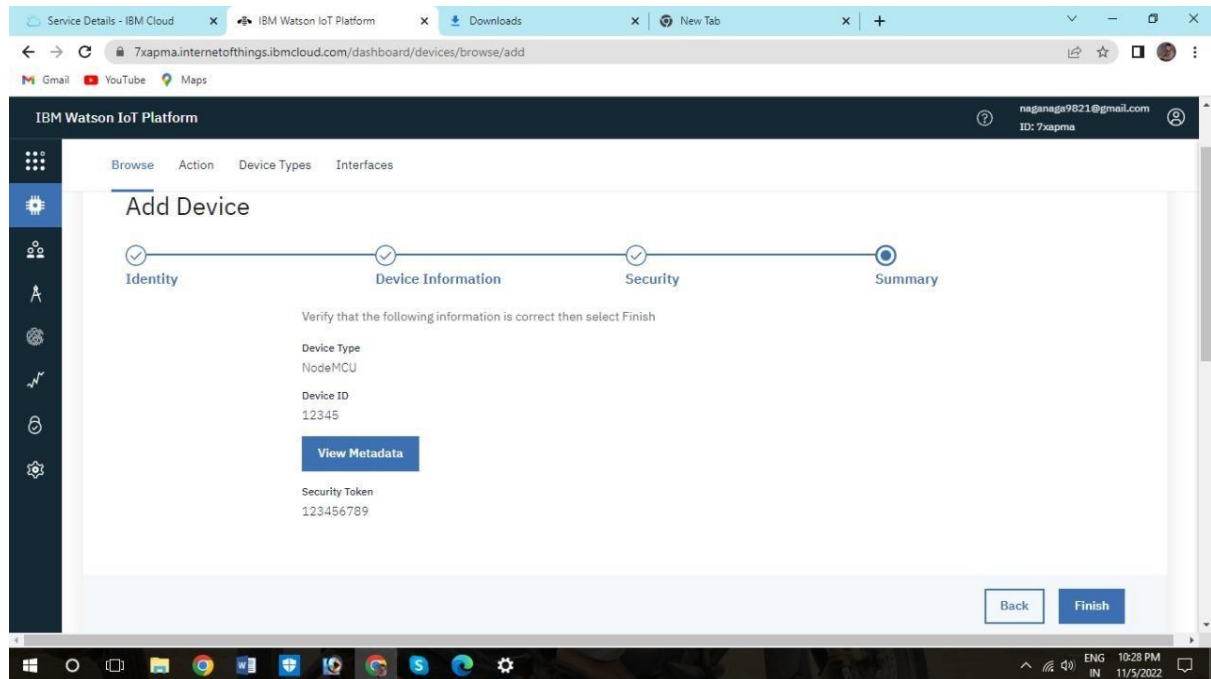

Authentication Token: 123456789

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

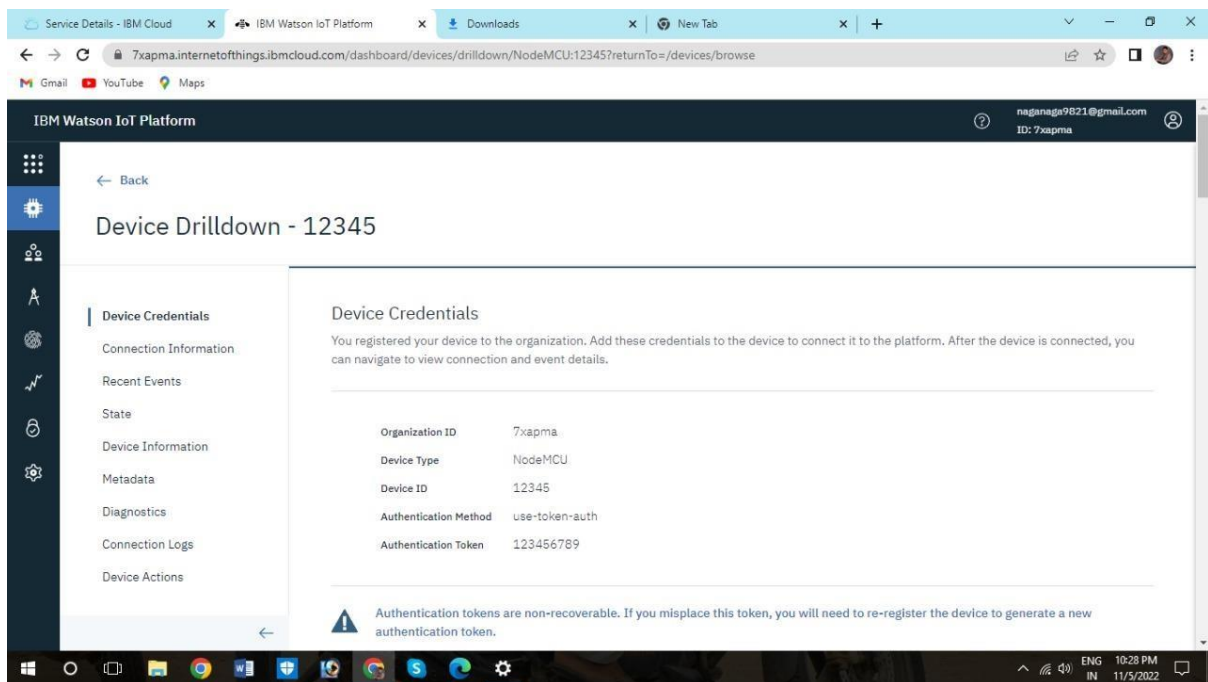

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.
